DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee,
2. Authorization for this examiner's amendment was given in a telephone interview with Bruce Troxell (#26,592) on 2/14/2005. The following items were amended:
3. In claim 1, on page 11 lines 1-2, "for, for example," has been changed to -- for example, a --.
4. In claim 1, on page 11 lines 7, and 14, "for" has been deleted.
5. In claim 1, on page 11 line 16, "to expose" has been changed to -- being exposed --.
6. In claim 4, on page 12 line 21, "fitly transversely locate" has been changed to -- traverse --.
7. In claim 4, on page 12 line 24, "existed" has been changed to -- extending --.
8. In claim 4, on page 12 line 25, "as locked together" has been changed to -- when said plates are locked together --.

The above changes have been made to correct typographical errors.

Allowable Subject Matter

9. Claims 1- 4 allowed.

10. The following is an examiner's statement of reasons for allowance: With respect to claim 1, Mori (Publication # 2003/0193781), Akhtar et al. (Patent # 6,741,463) and Liu et al. (Publication # 2004/0188362) teach a variety of the limitations as expressed by the applicant. Such examples include a main body fixed to a rear end (Akhtar et al. Fig 1, 14) containing at least two sockets (As illustrated in Fig 2a), a control panel (Fig 1, 13) including buttons (As illustrated on the face of element 13). Akhtar further illustrates a connector (50) between each body (13 and 14) but fails to teach that the main body contains a control circuit. Further Akhtar et al. fails to teach that the longitudinal direction between the front and the rear end of the rack is smaller than the overall distance between the front and the rear end of the rack.

11. Additionally Liu et al. teaches the use of a main body (60) connected to a rear end of a rack (70) and further teaches at least two sockets on the rear side (Fig 5, rear end of 60). Liu et al. fails to teach the use of a control panel fixed to the front end of the rack, and further fails to teach that the longitudinal direction between the front and the rear end of the rack is smaller than the overall distance between the front and the rear end of the rack.

12. These limitations are believed to render the subject matter allowable over the art of record.

Art Unit: 2835

13. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
